DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 7/31/2007.

Claims 1-4, 6-9, are amended, and new claim 21 is offered for consideration.

- 2) Claim 4 objection is withdrawn in view of amended claim.
- 3) Claims 1-10 rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of amended claims.

Election/Restrictions

- 4) This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (a) species of a method for the continuous cooking of wood raw material for the production of cellulose pulp recited in claim 1;
- (b) species of a method for the continuous cooking of wood raw material for the production of cellulose pulp recited in claim 21.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1731

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-10 read on species (a);

Claim 21 reads on species (b).

The following claim(s) are generic: none of the claims are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Claim 21 is either obvious over or anticipated by Suckkenes (US 2002/0079071). Accordingly, the special feature linking the two inventions, a method of cooking of wood raw material in a continuous pulp digester vessel, the feeding of wood raw material and cooking fluid entering the vessel on top and the final pulp exiting the vessel at the bottom, the temperature of cooking in the range claimed, concurrent zones and countercurrent zones, a first zone a second and third zones, a discharge zone, pressure differential monitoring, cooking time, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, the restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone no. is 571-272-1190.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
